soprano in the choir of St. Peter's Church, corner of Lindell and Spring avenues, St. Louis, and Sherman, who was a student at the University of Illinois until this spring, when he gave up his studies to accompany his father to the West.

Their trip was made in the early spring and reports had in the main been encouraging. Major Brink for years was engaged in the collection and publication of historical data of Illinois, and this occupation took him all over the State, so that there were few localities in which he was not known. He interested himself in Republican politics, and although he never held office he was for a long time a leader in local affairs.

No arrangements have been made for the funeral, as it is not known at what time the body will arrive.

## 11:00 am 11:05 pm 15:00 am 15: ARID BELT FERTILE.

Good Results Are Expected to Follow Recent Legislation by Congress.

The Republic Bureau, 14th St. and Pennsylvania Ave. Washington, June 22.-After years of untiring effort, a law providing for the irrigation of arid lands has been placed on the

Federal statute books. In this system of agriculture the United States has been behind the countries of the Old World. The Japanese have practiced irrigation for thousands of years and the Chinese have been able by such methods to retain the fertility of their soil for centuries. The English Government has spent millions of pounds in furthering the interests of the cultivators of the soil in India through irrigation and in doing so not only benefited the vast population of that country, but their prosperity has seriously af-fected the market of the American farmer, and it is the American farmer who will primarily benefit by the bill which was

signed a few days ago.

Speaking on this subject to-day, Secretary
Wilson of the Department of Agriculture said: "In developing these arid lands the product of the Western country will increase the great aggregate of wealth which the American farmer is bringing back to this

many additional acres of arid land we may reclaim and cultivate.

"It will have a material influence on many of our farmers, who are now flocking across the line into Canada in the vicinity of Assimbolne, and they compose an element we should keep here. These arid lands can be so enriched by irrigation that you can grow anything on them that you plant."

Secretary of the latest the state of the secretary of the latest arid lands. plant."

Secretary of the Interior Hitchcock said:

"I am very proud that this bill has become a law. In the first place it is admirably constructed and surrounded with safeguards from corruption and land monopoly. It opens a wide field to settlers and assures them the creation of prosperous homes, and I know of no function in the power of the Government higher that that. These public lands are the heritage of the nation and should be held for homes, being reserved for actual settlers under the homestead act."

Data on the Philippines. Data on the Philippines.

Washington, June 22.—One of the most valuable publications yet issued from the division of insular affairs of the War Department is "A Pronouncing Gazeteer and Geographical Dictionary of the Philippine Islands, with Maps, Charts and Illustrations." The first part of it is just from the press. The introductory notice recites the fact that thousands of appeals to the Department for information respecting the Philippine Islands, indicate a widespread desire on the part of the American public for such a book as this. So all the official data within reach have been gathered together and the result is a mass of information respecting the islands.

Guthrie, Ok., June 22.—Four deaths bysvio-lence are reported from over the Territory, While fording the Salt Fork on the Texas-Oklahoma line, Miss Lela Miner was thrown from her horse, which struck her head with his hoofs and killed her. The uct of the Western country will increase the great aggregate of wealth which the American farmer is bringing back to this country for our agricultural exports. Irrigation creates home markets and it will develop a market for our products in Asia which will absorb the whole surplus of farm products in the West, no matter how
